

27<sup>th</sup> March 2018

Rockingham Wild Encounters have been using Fuel Doctor for the last 8 weeks on 'Apollo 3,' our Swim With Wild Dolphins eco tourism boat, which has 2x 700hp C12 cats .

My goal in using Fuel Doctor, was to cut down the diesel soot emissions around wildlife and passengers, as well as reducing the amount of cleaning labour time, soap and paint sealer/wax usage.

It first became evident Fuel Doctor was working, when our primary Raycor filters were saturated with sludge from the fuel tanks. We changed the filters and continued to shock treat the fuel system. This has resulted in a dramatic decrease in diesel soot under our main deck roof and transom.

I am seeing 80% less soot on a daily basis, especially on the roof, which is now almost non-existent.

I highly recommend Fuel Doctor on commercial and private vessels if diesel soot is a problem.
